***Response to Arguments***

Applicant's arguments with respect to claims 83, and 85-86 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 83, and 85-86 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The invention relates to a method for rendering an image representing a fluid motion or providing a simulated motion features (e.g., a stream of water or a flow of smoke). The claims 83 and 85 claim rendering section by mapping first and second texture images that represents the motion of texture images however, the concert results are not recognized at the end of the claimed.

***Allowable Subject Matter***

Claims 88-94 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: In respect to the specification in fig. 17 the texture moving means for arbitrarily moving the first and second semitransparent texture images to rewrite them into the texture rendering area, thereby causing said first semitransparent texture images to be associated respectively with different polygons from among said first polygons and causing said second semitransparent texture images to be associated respectively with different polygons from among said second polygons, wherein operations of the first semitransparent object rendering means, the second

semitransparent object rendering means and the texture moving means are repeated, representing in fig. 2.

Claim 84 and 87 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The following is a statement of reasons for the indication of allowable subject matter: the second semitransparent texture images are associated respectively with different adjacent polygons from among the second polygons in a circulating manner i.e represented the flow motion in fig. 2.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
